

Diving the Coral Triangle

Experience the thrill of drift diving at Isla Verde near Puerto Galera and the eery WWII shipwrecks of Coron. This itinerary will take you south of Manila for a chance to see the Taal volcano before you spend your holiday diving. Puerto Galera is home to some shallow dives great for novices and those who love looking for macro life. Experienced divers can cross the channel toward Isla Verde for some roaring drift dives along a colourful coral wall to spot big schools of fish. In Coron, penetrate a number of Japanese ships sunk during WWII or try a peculiar dive in Barracuda Lake where fresh and salt water in one very warm lake may play tricks on your eyes.

Please remember this is a sample itinerary and we are happy to modify it to suit your plans. We can add or remove days and look at different places to stay.
