

# Best Time To Visit St Lucia

Best Time To Visit St Lucia? Just like our other two Caribbean Islands, Tobago & Barbados, St Lucia has a year-round tropical climate and is generally warm and sunny all year round with an average daytime high of 30°C / 86°F. In fact, St Lucia has over 3,000 hours of sunshine each year! January through June usually have the most ideal weather, while July to November are the rainier months. However, even rainy days experience a good amount of sunshine. The prevailing northeast tradewinds blow steadily so that although it is bright and sunny, it is not unbearably hot. The nights are usually slightly cooler making it the perfect holiday destination.
